

My Kind Of Love

Mouthwash

I crept away from the world to find a quiet place to hide
A place where I could contemplate, oh yeah
A place where I could clear my mind
And then one day some girl walked by and she called from the side of the road
She said she'd seen a short cut
She said she'd seen the pot of gold
Too many faces I can't trust
Could it be that your the one
And then she said to me
I'll only take you half the way
The other half is up to you
And then she turned and walked away
So what else could i do
She was my kind of love

Girl I need your shining eyes to brighten up my day
And I need your words of praise to guide me on my way
Did you know i'm so willing to play along with your game
Cause you're the only one who makes me feel the heat in the pouring rain
There's one thing that you should know
There's no way I'll ever let her go
Because I don't know nothing better than to kiss her lips
