

## My Kind Of Love

Mouthwash

I crept away from the world to find a quiet place to hide  
A place where I could contemplate, oh yeah  
A place where I could clear my mind  
And then one day some girl walked by and she called from the side of the road  
She said she'd seen a short cut  
She said she'd seen the pot of gold  
Too many faces I can't trust  
Could it be that your the one  
And then she said to me  
I'll only take you half the way  
The other half is up to you  
And then she turned and walked away  
So what else could i do  
She was my kind of love

Girl I need your shining eyes to brighten up my day  
And I need your words of praise to guide me on my way  
Did you know i'm so willing to play along with your game  
Cause you're the only one who makes me feel the heat in the pouring rain  
There's one thing that you should know  
There's no way I'll ever let her go  
Because I don't know nothing better than to kiss her lips
