

Around the World

Mr. Big

I can make a couple a calls
Let's see whatever way it falls
True it's seems a little bit late
Got a dream and it just can't wait

A million places
We're wanting to be
Where everybody's standing
Now they're startin' to scream

'Round the world we go
Get a laugh from the people that you know
'Round the world we go
Stick around 'til the evening starts to blow
'Round the world we go
Now it's time to let your head explode

I can see it comin' down
I know that you can feel the sound
You and I were made to move
Just put the diamond into the groove

A million faces we're hoping to see
Where everybody's standin' staring back at me

'Round the world we go
Get a laugh from the people that you know
'Round the world we go
Stick around 'til the evening starts to blow
'Round the world we go
Now it's time to let your head explode

Everybody needs a little gettin' away
Shout it all together we've got somethin' to say
Gather up anyone that you can find
Forget the masqueraders leave 'em all behind

'Round the world we go
Get a laugh from the people that you know
'Round the world we go
Stick around 'til the evening starts to blow
'Round the world we go
Get a laugh from the people that you know
'Round the world we go
Now it's time to let your head explode
