

# Around the World

Mr. Big

I can make a couple a calls  
Let's see whatever way it falls  
True it's seems a little bit late  
Got a dream and it just can't wait

A million places  
We're wanting to be  
Where everybody's standing  
Now they're startin' to scream

'Round the world we go  
Get a laugh from the people that you know  
'Round the world we go  
Stick around 'til the evening starts to blow  
'Round the world we go  
Now it's time to let your head explode

I can see it comin' down  
I know that you can feel the sound  
You and I were made to move  
Just put the diamond into the groove

A million faces we're hoping to see  
Where everybody's standin' staring back at me

'Round the world we go  
Get a laugh from the people that you know  
'Round the world we go  
Stick around 'til the evening starts to blow  
'Round the world we go  
Now it's time to let your head explode

Everybody needs a little gettin' away  
Shout it all together we've got somethin' to say  
Gather up anyone that you can find  
Forget the masqueraders leave 'em all behind

'Round the world we go  
Get a laugh from the people that you know  
'Round the world we go  
Stick around 'til the evening starts to blow  
'Round the world we go  
Get a laugh from the people that you know  
'Round the world we go  
Now it's time to let your head explode
