

# Hunters of the Night

Mr. Mister

He's a lean and hungry hunter, on the street tonight the fire's  
bright  
She's in his sights  
She's a lonely little dancer, out to find a daring new romance  
The girl takes a chance

They're hunters of the night, find their love where they might  
We're all hunters of the night  
Yeah

She can see her lonely stranger, standing in the cold street co  
rner light  
There in the night  
She can feel his arms surround her, wanting this embrace to nev  
er end  
Still once again

They're hunters of the night, find their love where they might  
We're all hunters of the night  
We're all hunters of the night

See the lean and hungry hunter, standing in the cold street cor  
ner light  
There in the night  
She can feel his arms surround her, wanting this embrace to nev  
er end  
Still once again

They're hunters of the night, find their love where they might  
We're all hunters of the night

We are hunters, we all hunt the night  
Findin' love wherever they might  
Yeah

We're all hunters, we're hunters of the night  
We're all hunters of the night  
We're all hunters of the night
