```
When I'm with you I only feel completness,
I can feel taste on my lips,
It's so hard to conceal the weakness caused by your fingertips.
If I told you just how deep my lovin' really goes for you,
And that you got all my trust,
If you knew tell me what would you do?
All I ever wanna do is love you,
That's why I take the time to make it special,
Night after night,
Night after night.
Everything I have is yours only yours,
Bothing ever touched my soul like this before,
Feels so right,
Feels so right.
Now if I told you taht you're worth the world and all it's love
to me,
If I told you that I wanna birth a family with you some day,
If I told you that I wanna grow old together what would you say
If I was to let you know I wanna see forever with you,
Would you run away?
If I told you I wanna be your drive,
Your strength and courage when your weak,
I send my angels out every night to protect you from the street
If you knew I'd sacrafice almost everything to keep you happy,
Would you let me love you for life,
```

It's all I want It's all I need
