

Take you away now
Take you away now
We're gonna fight into your heart

Original bad gal 'pon the radar
Where the fierce sound boy we not afraid
Eat cheese hot like potato
I'mma high from the anticipation
Never know 'bout the moves we've been making
Best things come to those who have been waiting

So hold on tight cause you can't never run from what you see
Take my advice spirits
Don't fly unless they are free
I've been taking it to the world
(Ayahoo ohh)
Have no fear now

Levitate-tate

No need see me now what's up ya'know
No need see me set thing up ya'know
No need see me make this rock ya'know
But the rhythm never let me down (down)
No need see me now with the style ya'know
No need see me set things up ya'know
No need see me make this rock ya'know
But the rhythm never let me down (down)

None of them can mess with the style no
It's why all of them follow where I go
Got the beat killer you say as I go
And where taking you back like the high top
Come again with the fire I can't stop!

Take you way now
Take you away now
We're gonna fight into your heart
So hold on tight cause you can't never run from what you see
Take my advice
Spirits don't fly unless they are free
I've been taking it to the world

Oh, breathe from it all
Deep in yourself and now let the rhythm take you there
Oh, breathe from it all
Back off the wall
And now let the rhythm take you there

No need see me set things up ya'know
No need see me make this rock ya'know
