

# Leave Me Alone

MS MR

God knows things could be worse  
But it's hard seeing you age  
The man I once knew staring back at me  
Baby things sure ain't the same  
I'm trying to be better  
Working to understand  
The changes you're making  
To be a better man  
I'm still listening, I'm still loving  
I'm still listening, we still struggling

Hard truce biting my heels  
These roots have no home  
The only way I know you love me  
Is when you leave me alone  
Please just leave me alone  
Please just leave me alone  
Won't you leave me alone  
Won't you leave me alone

No one taught me better than you  
There will be highs and there will be lows  
Not a lot has to change  
Things just can't stay the same

Hard truce biting my heels  
These roots have no home  
Only way I know you love me  
Is when you leave me alone  
Please just leave me alone  
Please just leave me alone  
Won't you leave me alone  
Won't you leave me alone

I assumed too little  
And we lost too much  
When it comes to love  
A lesson learned isn't learned enough  
I was damaged  
You were exposed  
When it comes to love  
When it comes to love  
When it comes to love  
A lesson learned isn't learned enough

Hard truce biting my heels  
These roots have no home  
Only way I know you love me  
Is when you leave me alone  
Please just leave me alone  
Please just leave me alone  
Won't you leave me alone  
Won't you leave me alone

Please just leave me alone  
Please just leave me alone  
Please just leave me alone

Alone, alone, alone
