

How I worry about you  
No one to pull you out of the blue  
Anger and sadness get the best of you  
Your words choked by a weak tongue  
Too sad to be so young  
Dependence on despair will get you nowhere

This time, this time where did you go?  
You're not alone, where did you go?  
This time, this time you're not alone  
Where did you go?  
You're not alone

Wish I could erase the pain  
To better help you survive another day  
Your words choked by a weak tongue  
Too sad to be so young  
Dependence on despair will get you nowhere

This time, this time where did you go?  
You're not alone, where did you go?  
This time, this time you're not alone  
Where did you go?  
You're not alone

Spend everyday by your side,  
Till I know that you're alright  
(Till I know you're alright)

This time, this time where did you go?  
You're not alone, where did you go?  
This time, this time you're not alone  
Where did you go?  
You're not alone
