## **A New Game**

Mudvayne

Hunger inside me, that's always rising To quench is to kill Lusting enemy but you don't know me Snatched against your will To satisfy me, pick my victim Stealth is me (those poor little girls) So charming, say all the right things Just come with me (let's go for a ride) Trust me, believe me Don't be so deceiving God help me, betray me From blood lust and beatings I just wanna play I just wanna play A New Game The hunter within me That's always searching, thirst for the kill Abducted, take away cursed with the patience Of a thousand men Peel my eyes, lock on target The covert man (you never had a chance)

Don't be alarmed, want some candy? Just right over here (now get inside) Trust me, believe me Don't be so deceiving God help me, betray me From blood lust and beatings I just wanna play I just wanna play A New...

I just wanna play, I just wanna play I just wanna play a game A New Game

You meant everything to me But now your time has come Another broken doll to me But now your time has come You meant everything to me But now your time has come Another broken doll to me But now your time has come

Let's take a ride

I just wanna play I just wanna play a game One that you've never played before One that you'll never play again, I'm sure I just wanna play I just wanna play a game One that you've never played before One that you'll never play again, I'm sure I just wanna play I just wanna play a game One that you've never played before One that you'll never play again, I'm sure
