

Leave me alone its nothing serious
I'll do it myself
Its got nothing to do with you
And there's nothing that you could do

You can see it and you can almost hear it too
You can almost taste it
Its nothing to do with you
And there's nothing that you can do

So come in my cave
And I'll burn your heart away
Come in my cave
And I'll burn your heart away

Please close your ears and try to look away
So you'll never hear a single word I say
And don't ever come my way

So come in my cave
And I'll burn your heart away
So come in my cave
And arrest me for my mistakes
