

Forever Begins Today

Mustasch

How on earth were you created
Either it is heaven or it's hell
I don't buy: "It's not your fault"
It's you, and you must do this by yourself
Take control, rise and shine
You have to quit this living like you're dead

You wanna break through heaven
You really need to change
So don't say tomorrow
Forever Begins Today

How on earth were you created
Please don't treat yourself like human waste
You better bring it up, sweet lady
Before you're totally falling out of place

You wanna break through heaven...
