

Morning Star

Mustasch

The sun and moon, I'll take them down for you
A little something for my gratitude
I am holding her right in my arms
I've been blinded by the Morning Star

I used to be a self-centered man
All of a sudden there's a change of plans
You came into my world and blew my cool
My sleeping beauty can't stop watching you
And if the thunder wakes you up tonight
I will comfort you and hold your hand

The sun and moon, I'll take them down for you
A little something for my gratitude
I have been blinded by the Morning Star
'Cause I'm holding her right here in my arms

Morning Star

Now listen honey, I'm am serious
Beware of danger, don't be too curious
I would die if you would hurt yourself
If someone harms you they will burn in hell
I will hold your hand and comfort you
I love you so it feels my heart could blow

The sun and moon, I'll take them down for you
A little something for my gratitude
I have been blinded by the Morning Star
'Cause I'm holding her right here in my arms

Morning Star
