

Careful when you open  
It's easy to be broken  
In the strangest fashion  
You start a chain reaction  
You look my way  
Something's pounding away  
And I wonder if I ever felt this before

All this time, Oblivious  
To what You make so obvious  
I can't believe I never noticed my heart before

You are reaching for something that is beating  
I can't believe I never noticed my heart before  
Over and again, they say I have lost it  
I can't believe I've never noticed my heart before

At least until I noticed You and Your ways  
Captured what I've missed  
In the perfect fashion  
Just watch my heart's reaction  
This part of You is nothing that I'm used to  
But I won't close my eyes cause they're on to You

All This time it was staring me blind  
I can't believe I never noticed my heart before

You are reaching for something that is beating  
I can't believe I never noticed my heart before  
Over and again, they say I have lost it  
I can't believe I've never noticed my heart before

At least was never until I noticed You  
Whoa, Oh, Oh

The only time I ever noticed my heart  
Was when I noticed You, Yeah  
The only time I ever noticed my heart  
Was when I noticed You, Yeah  
You yeah  
You yeah

You are reaching for something that is beating  
I can't believe I never noticed my heart before  
Over and again, they say I have lost it  
I can't believe I've never noticed my heart before

Til I noticed You yeah  
I noticed You yeah  
When I noticed You yeah  
You yeah  
When I noticed you yeah  
I noticed You yeah  
That's the only time I ever noticed my heart before
