My Chemical Romance

Move your body when the sunlight dies
Everybody hide your body from the scarecrow
Everybody hide

Make a wish when your childhood dies
Here the knock, knock, knock when she cries
We're all alone tonight

Hold your breath when the blackbird flies
Count to seventeen and close your eyes
I'll keep you safe inside

He burns my skin
Never mind about the shape I'm in
I'll keep you safe tonight yeah

Move your body when the sunlight dies
Everybody hide your body from the scarecrow
Everybody hide (2x)

Blow a kiss at the methane skies
See the rust through your playground eyes
We're all in love tonight. (In love tonight)

Leave the dream where the fallout lies
Watch it grow where the tear-stain dries
To keep you safe tonight

He burns my skin
Never mind about the shape I'm in
I'll keep you safe tonight yeah

Move your body when the sunlight dies
Everybody hide your body from the scarecrow
Everybody hide (2x)

Love, love, love won't stop this (3x)

Run, run, bunny run (2x)

Move your body when the sunlight dies
Everybody hide your body from the scarecrow
Everybody hide (4x)
