

Summertime

My Chemical Romance

When the lights go out
Will you take me with you?
And carry all this broken bone
Through ...

Highways I called home
Something I can't know 'til now
Until you pick me off the ground
With brick in hand, your lip gloss smile
Your scraped up knees

And if you stay I will either wait all night
Or until my heart explodes out
Until we find our way in the dark and out of heart
You can run away with me any time you want

Terrified of what I'd be
As a kid from what I've seen
Every single day when people shot
And put the pieces back together

Just to smash them down
Turn my headphones up real loud
I think I need them now
'Cause you suck the noise out

If you stay I will either wait all night
Or until my heart explodes out
Until we find our way in the dark and out of heart
You can run away with me any time you want
Well, anytime you want, well, anytime you want

Don't walk away
Don't walk away
Don't walk away

'Cause if you stay I will lead the way alright
But not until my heart explodes out
Until we fall away in the dark and out of heart
You can run away with me
You can run anytime you want
You can run away with me anytime you want
