

## Every Lie

### My Darkest Days

So where did you sleep the night before?  
I doubt that your phone was dying  
I'm supposed to believe that is what you wore  
Said you were alone, I don't buy it  
Now I can't stay

Surrounded by every lie that won't come true  
Now you wanna take the time but why would you  
Think you're gonna make it right but how could you  
So I can't stay, surrounded by every lie

You might as well just stop crying  
It doesn't mean much to me anymore  
A little too late to start trying  
I'm taking this love off of life support  
Now I can't stay

Surrounded by every lie that won't come true  
Now you wanna take the time but why would you  
Think you're gonna make it right but how could you  
So I can't stay, surrounded by every lie

Every lie that won't come true  
Now you wanna take the time but why would you  
Think you're gonna make it right but how could you  
So I can't stay, surrounded by every lie

Trying to undo the love that I'm tied to  
Who haven't you lied to

With every lie that won't come true  
Now you wanna take the time but why would you  
Think you're gonna make it right but how could you  
So I can't stay, surrounded by every lie

Every lie that won't come true  
Now you wanna take the time but why would you  
Think you're gonna make it right but how could you  
So I can't stay, surrounded by  
No, I won't stay, surrounded by every lie
