Under Your Wings and into Your Arms

My Dying Bride

I need to see a sign Will you take me away? They come. They go. Will you stay here? I need to see a sign You need me Who wants more? I need him Find my way Be there now Feel them Be my call You sing the songs Of one hundred nights Bring them to me Because I know I'm right and I will Take them all away Never to be seen again I'll take them to the sea Leave it all to me because I'm Feverish, develish and irrelevant You need me I want you I need, I need, I need Are you there with me Be there now Feel me now All my world
