

## Say So

### My Favorite Highway

It's like we're standing outside while they're looking out the window  
Picking up pace, losing control  
Of all the things we are, all the things we know, it's like...hey (it's like hey)  
It's like I just couldn't care less, but I'm wrapped around her finger  
Started placing all my bets the day that we met  
And staying up too late, the way you make me wait, it's like...hey (it's like hey)

Don't you know if you go  
You'll go without me  
Don't you leave me as if you never cared at all  
If you go, don't go, go without me  
Don't you need me?

So say, you are my everything  
Just say, I'm hanging onto every word that you said  
A part of me will never be the same

It's like she takes me up to ten, but she leaves me at eleven  
Now you're telling all your friends everything you intend  
All the things you do, I love the way you move, it's like...hey (it's like hey)  
She wears that little black dress, always simple, but it's sexy  
And I need you in your best so I won't forget  
All the way, say that you love me, gotta hear you say it

Don't you know if you go  
You'll go without me  
Don't you leave me as if you never cared at all  
If you go, don't go, go without me  
Don't you need me?

So say, you are my everything  
Just say, I'm hanging onto every word that you said  
A part of me will never be the same

Say so, just say so, say so, say so, just say so, say so,  
Say so, just say so, say so, say so, just say

You are the light up ahead at the end of the road  
When I look in your eyes, girl, it feels like I'm home  
I need this night, yes it's late, but the morning will come  
I know, and I know, and I know  
As you fall fast asleep with your head on my chest  
I watch you breathe in and out as you're finding your rest  
I need this night, yes it's late, but the morning will come  
I know, I know, I know

So say, you are my everything  
Just say..

So say, you are my everything  
Just say, I'm hanging onto every word that you said  
So say, you are my everything, baby  
Say, I'm hanging onto every word that you said  
A part of me will never be..

No apart of me will never be..

No apart of me will never be the same
