

## Steam Engine

## My Morning Jacket

So, I do believe  
None of this is physical, at least not to me  
So, I do believe  
That anywhere it goes, it's always with me

It's not the dream that makes you weak  
It's not the night that makes you sleep  
But it's a voice and it's a choice  
To call you out or stay at home

So, I do believe  
None of this is physical, least not to me  
So, I do believe  
That anywhere it goes, it's always with me

It's not the beast, it's not the sheets  
So soft and warm all over me  
But it's a touch you need so much  
To move around on this green earth, ahh

Take your money and your drugs  
Take your money and your drugs  
To anyone who wondered  
What old Jebus meant to me

Take him out to go diving  
In Red Patoka sea  
The brain melts in the twilight  
With the boar and moving trees

Your skin looks good in moonlight  
And goddamn those shaky knees  
The fact that my heart's beating  
Is all the proof you need

I believe  
I believe  
I believe  
...
