

## Spotlights

## My Vitriol

Yesterday they came  
And took you away  
You were waiting for a change  
They walk the alien lanes  
Into outer space  
Which I know in time will change

You're turning round  
But the spotlights will follow you round

Yesterday's the day  
They took you away  
It all seems so strange  
You look the other way  
'Cos they're playing their games  
All the same again

You're turning round  
But the spotlights will follow you round  
You're running out now  
But the spotlights will follow you round  
The spotlights will follow you round

You're coming down  
You're only light years away  
You're falling down  
You're only light years away  
But you were always light years away  
You were always light years away
