

Motionless fight against the action  
Standing holograms in line  
Erasure of familiar sound of failure  
Obliteration is liberation

Night in dreamlike dominion  
The approach of darker dimensions  
Doctrine of delusions veiled in flesh  
Discard the capture of nothingness

Escapist of the slave machinery  
The hollow line of least resistance  
Blindfolded mass in surrealistic scene  
Heed the oscillation of the new damned breed

... my body's shuddering, vaporizing

Re-evolution starts tonight  
Nightmares of dreamers come alive  
Chaotic sphere of madness on fire – bursting inside  
Revelations illustrate, visions of inner self collide  
Take a ride of death in life... dreamscape, escape

Slave-driver of slave-labor, godpuppet of deceased failure  
Autopilot of emptiness, abduction out of nothingness

Re-illuminate the self, machine-spawned mind  
Enter the realm of human device  
Dream projecting rush of entrophy  
Can't fight the lost gravity

Beam of fire in my eyes, screaming in my mind  
The burning red I see, bending realities  
Succumbed, out of will, paralyzed... I can't get out  
Gleam of light in my eyes, penetrating my mind  
The flashing red I see, blending in my bloodstream  
Desolated dreams, hypnotized... I just can't get out

I can't wake up, I can't breathe inside,  
I'm stuck in this carnal cage  
I can't get out, I can't move inside,  
I'm paralyzed in this astral-like sleep

Re-invent yourself, machine-spawned soul  
Soaring on a blood-filtered twilight zone  
Dream-injecting rush of entrophy...  
Dissolved in your heresy
