

## Dust Devils And Cosmic Storms

MyGrain

Flashing holograms of artificial life  
In the darkest corners of the very mind  
Away this chemical institution of oblivion  
Discarded memories veiled in confusion

Pictures in my head like fiction  
Blending through the night-veiled kingdoms...  
Gruesome revelations

Dust devils and cosmic storms spinning around my head  
My particles accelerating, angels dust to burning winds of red  
Face twisting and quantum erasing  
Time particles accelerating  
Pi-helated spiral ways to Sirius  
This is the ultimate versus terminus

Born of memory-projecting termination device  
Supercharger if the planetary demise  
Sweet and genocide dreams I see of a mankind  
Like the cleansing rain...  
Wash away to reign

The storm is breaking to change everything  
The storm is invading... Erasing... Re-breeding

Dust devils and cosmic storms

Rapid eye movement deciphering the secret windows  
Spark the endless leaps to unknown  
Non-gravitational motion through the hidden kingdoms  
Universe beyond expanding black holes

Like a perfect chaos of macrocosmic scales  
Astronomical body's hidden gateways  
Blazing like a vortex, across the brain  
In layers of the cortex, peel off the pain
