

## Mechanimal Instinct

MyGrain

I am the bestial urge to kill, the hi-tech drug of thrill  
In a hyper sleep of mind I electrify your might  
Heads amplified to the oscillation of smothered rage  
Wired discordance, the new darker age

Artificial afterlife, manifestation of mechanized  
System overload, sensory self destruct mode

Bleed electric sanguine dreams, all imbibing gods conceived  
Behind the lenses of surveillance, the mirror image, oblivious  
self  
Trained to contaminate, the monitored performance  
Controlled in the distance, this tainted existence

Artificial afterlife, manifestation of mechanized...

I am mechanical, system overdrive  
I am the animal within, the beast inside your skin  
I am supremacy, the instinct of survival  
I am the swarm subliminal, the mutiny within

You're the freak machinery, the glitch we created  
Reek of enslaving fouls in our race to retaliate  
Now bow the god from machine of malfunction  
The damaged good, the spawn, defeatd fruition

I am mechanical, I am an animal...

Flat line heart kill, the scaled beast within  
Living dead thrill, pulse of shedding skin  
Ego hidden bypass generator  
Nervous system overdrive accelerator

Bleed for me, your divine obscurity  
Give yourself to me  
Feed me now, my insatiable hunger  
The oblivious cancer

Component in assembly line of vile entirety  
Obedient son of the system held by infinite greed  
Heed the will to destroy, the war machine of violent joy  
Feed the will to control, the messiah for decadent soul
