

Love Stood Still

MYMP

Love was a lighthouse guiding the way
We were two boats on the ocean
Following shadows that led us astray
Case of mistaken emotion

Suddenly you've drifted back to my arms
And while we were lost in the dark

Chorus:

Love stood still
Movin' us together
Love stood still
Leading us towards each other
Now we're back at the start
Cos while we were apart
Love stood still

Love was a fire burned down to the
Waiting for something to spark
We were two fireflies drawn to the glow
Singing you lit the flames in my heart

I had my reasons for letting you go
But holding you again i know

[repeat Chorus]

Now you ask me to say
I'll always feel this way
Now then nothing has ever changed

[repeat Chorus]
