Love was a lighthouse guiding the way We were two boats on the ocean Following shadows that led us astray Case of mistaken emotion

Suddenly you've drifted back to my arms And while we were lost in the dark

Chorus:

Love stood still
Movin' us together
Love stood still
Leading us towards each other
Now we're back at the start
Cos while we were apart
Love stood still

Love was a fire burned down to the Waiting for something to spark
We were two fireflies drawn to the glow
Singing you lit the flames in my heart

I had my reasons for letting you go But holding you again i know

[repeat Chorus]

Now you ask me to say
I'll always feel this way
Now then nothing has ever changed

[repeat Chorus]
