

# Lonely Heart

Mystery

I wish that I could tell you  
All the feelings I keep inside  
I never seem to find the words  
When I stand there by your side

Maybe I should cast aside  
For a moment my foolish pride  
I just need to know the reasons why  
Last night you said goodbye

I wish that you could feel my lonely heart  
Crying out for you  
Give me the time I need to show you  
How much I care for you

I wish that you could hear my lonely heart  
Calling out to you  
I wanna hold you in my arms again  
And never let you go  
Every night I dream of you and me  
On the beach one summer night  
Together we feel the fire

I wish that you could feel my lonely heart  
And surrender to my love's desire  
For no one is to say  
If it's right or if it's wrong

I wish that you could hear my lonely heart  
All torn apart  
I wanna see your in my eyes again  
Your eyes again

Can't you feel my lonely heart  
Give me something to hold on  
I thought our love was growing strong  
Now I walk alone in the night  
Round and round, can't find my way  
As I still recall those nights together

Feeling the way I do  
I'm still in love with you
