

Hagen Von Tronje

Mystic Circle

born with the grace of Odin
inside the blood of the warrior
he was the lonesome hero
and a fighter of king Gunther
black was his armour
his sword was faster than winds
under the sign of the falcon
he beats every enemy
one eye in his head that shows
how many fights he had
and the long scar in his face
that shows how he was injured.
his home in the higher north
is a place called Tronje
and his gloomy castle is behind storms and ice cold winds
the one and only love he had
was the beauty Kriemhild
he had sworn to fight for her
and to give his life
with Brunhild he made a bond
against the holy Xanten king
and at the right time he should kill
the dragonslayer
but there were other sides in his life
we talk about
he were a proud knight
many victories he had
in his whole life
and no one could destroy Hagens heart
in a fight he was too strong
all the strength that he had
was from Odin
and to him he prayed until he died.
in the name of Wotan / Hagens soul was fighting
on his blackened horse / he rides till he dies
Ever on the search / of the sin of life
no quiet moments / a traveller he was
ever on a journey / find a love of life
but his destiny was / ever to stay alone
Hagen:
"Oh father Odin
take my soul up high
when I'm dead and gone
I'll sit in the walls of Wallhall
