## **Now Or Never**

## NamNamBulu

As we have wandered thousand years Through centuries of blood and pain I don't believe that god can feel Our mere existence

Technology is who we serve As we kill by remote control We do not see and do not feel Disaster is coming

It is time to know that it's now or never There will never be another chance What is wrong in doing things together If you try to take another glance Now that you've been tryin' so hard to get there It would be a shame to just let go Nothing's gonna happen if you just stare Wouldn't it be hard to never know

Is there no way to intervene To change belief of those who rule Or do we really have to face Our self-extinction

If he has ever been above Then he must truly be asleep Or we must pray for our souls That he is forgiving.
