

Like A Main Theme

Nana Mouskouri

Lalala...

I am like a song that hasn't been completely written
But my life is more than half way through a verse
I mean to say that I'm confused but it's been worse
And I feel like there is a chorus on the way
Like a main theme when the melody comes through
Kind a tells you what the song is going to be
But I love to know just what I'm going to do

I am in the middle
In the middle of a riddle
Just wondering how can life go through
Then all at once I look around and I see you
Then I feel like there's a chorus on the way
Like a main theme when the melody comes through
Kind a tells you what your song is going to do
In the middle of my riddle there's a goof
Lalala...

Now we're close together
Like the hands of time at midnight
At the moment when tomorrow meets today
I've got a feeling that the answer's on its way
Got a feeling that my future's here to stay
Like a main theme when the melody comes through
Kind a tells you what your song is going to do
Kind a tells me that I'll sing my song for you
Lalala...

Like a main theme
When the melody comes through
