

# Don't Mean Nothing

Nancy Sinatra

Sometimes you feel it  
Other times you're bored  
You understood me once  
But now you're lost  
You weren't sorry  
For things that you said  
And it don't mean nothing  
Cause we're already dead

You know I mean it  
You know I'm scared  
I've seen a hundred like you  
Running out of air  
You know I love you  
But you soon will see  
That it don't mean nothing  
Till you figure out what it means

It's clear to me, you're like  
The oceans and the light  
Try and you'll remember what you used to be  
It's clear to me this day can take you for a ride  
A place that you once longed to be  
I know you're tired  
I know you're hurt  
One day, I promise, baby  
You gonna make it work  
But for now the question  
Is laying in our hands  
And it don't mean nothing  
Till we figure out the plan

It's clear to me, you're like  
The oceans and the light  
Try and you'll remember what you used to be  
It's clear to me this day will take you for a ride  
A place that you once longed to be

One day you'll ask me  
What I thought of this  
If you don't recognize it  
Then you never will  
Oh baby don't you see I'm never coming home  
And it don't mean nothing  
No it don't mean nothing  
No it don't mean nothing
