

## Up Here

Naomi Terra

Roll into your town and I'm walking around  
Got some extra time think I'll throw some money down  
And you follow me around  
and you're asking for the time  
Your asking what I found  
think I'm gonna rob you blind

maybe it's the tattoo on my arm  
that I drew while I was bored waiting tables in new york  
a heart and two flowers intertwined with a vine  
I can see your point, I can see your point

And up here I am who I am  
And if you don't like it then fuck you, man  
I'm not a thief and a whore  
Please don't follow me around next time I'm shopping in your store

And up here I'm making you aware  
That if you don't like me well I don't care  
I'll be exactly who I am and if you got a problem with it  
Well that's your problem, man

After I've paid count the money that you made  
Then you go to the show like to be entertained  
And I get up on the stage  
Trained monkey in a cage  
And it's just another day just another day

And I can see you from my place on the stage  
Third row center aisle  
Hot blond with you  
All smiles  
And you got another woman but that's in another town  
And you can't wait til this is over  
Gonna lay that honey down

And up here I am who I am  
And if you don't like it then fuck you, man  
I'm not a thief and a whore  
Please don't follow me around next time I'm shopping in your store

And up here I'm making you aware  
That if you don't like me well I don't care  
I'll be exactly who I am and if you got a problem with it  
Well that's your problem, man

And your good values taught you how to behave  
Who to treat kindly and who to enslave  
And like all good men you still fall to the floor  
When a great big rack  
And a ripe round ass  
Walk through that door...

And up here I am who I am  
And if you don't like it then fuck you, man  
I'm not a thief and a whore  
Please don't follow me around next time I'm shopping in your store

And up here I'm making you aware  
That if you don't like me well I don't care  
I'll be exactly who I am and if you got a problem with it  
Well that's your problem, man
