

Nothing In This World Will Ever Break My Heart Again

Nashville Cast

I finally kept my pride
And hailed a cab
Those cuttin words you said
Were the last stab
There'll be no tears this time
They've all dried up
No more sweet poison
I already drank that cup
This tunnel's dark
But there's a little light glowing
Bright enough for me to run toward knowing

Nothing in this world will ever break my heart again
Nothing in this world will ever break my heart again
No pain this life will put me through
Will ever ever hurt like you

Don't need a miracle
A superhero
There's only one way up
When you're at zero
You took my innocence
But it was knowing
No i don't need you
And that made me a woman
I paid my dues
But that's a debt I'm done paying
I'm standing strong
But I'm still on my knees praying

Nothing in this world will ever break my heart again
Nothing in this world will ever break my heart again
No pain this life will put me through
Will ever ever hurt like you
