Nothing In This World Will Ever Break My Heart Again

Nashville Cast

I finally kept my pride And hailed a cab Those cuttin words you said Were the last stab There'll be no tears this time They've all dried up No more sweet poison I already drank that cup This tunnel's dark But there's a little light glowing Bright enough for me to run toward knowing

Nothing in this world will ever break my heart again Nothing in this world will ever break my heart again No pain this life will put me through Will ever ever hurt like you

Don't need a miracle A superhero There's only one way up When you're at zero You took my innocence But it was knowing No i don't need you And that made me a woman I paid my dues But that's a debt I'm done paying I'm standing strong But I'm still on my knees praying

Nothing in this world will ever break my heart again Nothing in this world will ever break my heart again No pain this life will put me through Will ever ever hurt like you
