

No One But Me

Nasri

I know that we've just met
And you might have a man
You might be married with tree kids
You might be all alone
Sitting by the phone
Or you might be the type that parties till the break of dawn
Whatever the situation
I'm willing to be patient
Cause I know in my heart

That no one's going sex you like I'll sex you
And no one's going to stress you like I'll stress you
And no one's gonna give you every minute ever [?]
No one else can give it to you
No one but me
No one but me
No one but me

I'm not a perfect man
I'll never claim to be
But if you're falling of the edge
I'll always catch your [?]
I wanna kiss your face
Right above your chin
I wanna put you in so close
You'll loose
