

War Against The Music

Nasri

The war against the music
Oh... woh... oh
Hey...

She stood in our room
With a sad look on her face
And I know
The tears were fallin' because of me
I can see it in her eyes
Now I've been tied up
Comin' home and she's already sleepin'
She doesn't feel loved at all (at all)
These days

She used to wanna hear every song I would write
Now every melody is just enough
To remind her of the time she doesn't spend with me
I see the flag in her hand and it's white
I guess she's gettin' tired of losin' (losin')
The war against the music

I never cheated
I wasn't out with the guys every night
I just believe in my dreams (my dreams)
They've taken longer than I thought
And it's too late now
I got my foot in the dark
And I can't stop this train now
From taking me to the stars

She used to wanna hear every song I would write
Now every melody is just enough
To remind her of the time she doesn't spend with me
I see the flag in her hand and it's white
I guess she's gettin' tired of losin' (losin')
The war against the music

She's at war, war
Hey, (she's at war)
The war against the music
She's at war, war (She's at war)

The war against the
Long nights waiting for me
When she had hard times
No shoulder to lean
She couldn't believe somebody could write about lovers
If they failed at love (yeah)
Oh, when it came down on the two of us
She says I couldn't open up
She used to

She used to wanna hear every song I would write
Now every melody is just enough
To remind her of the time she doesn't spend with me
I see the flag in her hand and it's white
I guess she's gettin' tired of losin' (losin')

The war against the music

She used to wanna hear every song I would write
Now every melody is just enough
To remind her of the time she doesn't spend with me
I see the flag in her hand and it's white
I guess she's gettin' tired of losin' (losin')
The war against the music
(She's at war, war, she's at war)
The war against the music
(She's at war, war, she's at war)
