

Imitation

Natalia Lesz

Artificial flavors they never leave you satisfied
You're just left waiting more
They say it's just like a sugar but it doesn't make you high
An empty filler abd what for
Using semantics, always dance around the truth
Never say what you mean
Barley even human, there's nothing when you look inside
Don't you miss the real thing

Like a barbie doll with her plastic hair
Would you want the fake when the real things here

Ay
Her love never be the same
No
She's just fallacy
Ay yo
She'll never make you feel like me
No
She just a temporary
Imitation
She's just an imitator
Imitation
And babe I'm so much better

So superficial she doesn't have that much to say
So synthetic just doesn't get it
Like cotton candy, so full of air she blows away
She's got a brain but what's it for

Ay
Her love never be the same
No
She's just fallacy
Ay yo
She'll never make you feel like me
No
She just a temporary
Imitation
She's just an imitator
Imitation
And babe I'm so much better

Why waste your time on five dollar wine?
Cuz I am champagne I put her to shame
If you want to share a love that never ends
Open up your heart and let the truth come in
