

Sexuality

It's every star you wish upon
Bio-astrological phenomenon
Since the dawn of history
It's been the greatest human mystery
Sexuality...

It gets you high
It makes you sick
Hard as you try
You'll never quit
You just can't get away from it
Sexuality...
Sexuality...

It's even bigger than the sun
It's the everything that we're created from
Kings and queens are made to kneel
Before the majesty of its appeal
Sexuality...

It gets you high
It makes you sick
Hard as you try
You'll never quit
You just can't get away from it
Sexuality...
Sexuality...

It's a blessing even at its worst
Even at its best sometimes it's like a curse
It gets to everyone of use eventually
Psycho, homo, hetero, inevitably
Sexuality...

It makes you high
Even though it makes you sick
Hard as you may try, no you'll never gonna quit
You just can't get, get enough of it
Sexuality...
Sexuality...

Sometimes it's sweet
Sometimes it's soft
It comes on hard and gets you off
And when it comes, it comes in spurts
Sometimes it gets so big it hurts

That's just the way it seems to work
