

# All the Roses

Natalie Imbruglia

What do I do with all the roses outside  
There not supposed to grow this time of year  
It's a hard rain but you got me smiling  
And you are the only one who can get me through

I can hear your voice when you're whispering  
I can feel your heart when it's beating  
I believe you're near when the ghost comes in  
I can hear you when you're calling out my name

I can remember when a day lasted forever  
Summer was everything and there was nothing to fear  
You were so tough but your heart said so much  
And nobody else got through quite like you

I can hear your voice when you're whispering  
I can feel your heart when it's beating  
I believe you're near when the ghost comes in  
I can hear you when you're calling out my name

Did I get hit by the moonlight, under the stars  
'Cos you feel so close that I can reach you  
Wherever you are

I can hear your voice when you're whispering  
I can feel your heart when it's beating  
I believe you're near when the ghost comes in  
I can hear you when you're calling

I can hear your voice when you're whispering  
I can feel your heart when it's beating  
I believe you're near when the ghost comes in  
I can hear you when you're calling out my name
