

My Own Movie

Natalie Imbruglia

Dreaming again of the summer time, when the world was
mine
Drifting again everything you do, makes me fall for you

Trying to keep it together without you around
You got me up here and now I can't seem to get down

Here it comes, taking over me
Close my eyes and I'm finally wondering will you
Here it comes, my own movie
In your arm where I wanna be wondering will you

Turn back the clock, what I didn't say on the beach
that day
I was afraid that you didn't feel everything I feel

Trying to keep it together without you around
You got me up here and now I can't seem to get down

Here it comes, taking over me
Close my eyes and I'm finally wondering will you
Here it comes, my own movie
In your arm where I wanna be wondering will you

Didn't wanna be 'cause of recently
You seem to suffer from the edges
Didn't wanna care if someone was there
How did you manage to open me up again?

Here it comes, taking over me
Close my eyes and I'm finally wondering will you
Here it comes, my own movie
In your arm where I wanna be wondering will you
Here it comes, taking over me
Close my eyes and I'm finally wondering will you
Here it comes, my own movie
In your arm where I wanna be wondering will you
