

With You

Natalie Walker

We've come a long, long way I must say
We've come a long, long way
Love takes time and time is on our side
Time is on our side
I was all alone and I didnt have a place
You came into my life and then everything changed
Love this strong never fades
Holds onto your life doesnt go away

We've come a long, long way I must say
We've come a long, long way
Love takes time and time is on our side
Time is on our side
I was all alone and I didn't have a place
You came into my life and then everything changed
Love this strong never fades
Hold's onto your life doesn't go away
Hold's onto your life never fades
Love is strong, never fades wih you

This world is a better place
This world is a better place with you, with you
This world is a better place
This world is a better place with you, with you
This world is a better place
This world is a better place with you.
