

Animals

Nathaniel

It's divine intervention
To know there's something spiritual
I felt so connected
Our bodies are electrical
I have been a satellite with you I wanna go
To places that we never been before
Take you and our passions
And leave them at the front door

Now we move like animals
Big white circle in the sky
The view so incredible
I wanna do this every night
We're moving like animals
Me and you are like animals

It's a deep conversation
And we're not even using words
Get fit to temptation
Launch your bridges and let them burn
I have been a satellite with you I wanna go
To places that we never been before
To a new elevation
And levitate above the floor

Now we move like animals
Big white circle in the sky
The view so incredible
I wanna do this every night
We're moving like animals
Me and you are like animals

There's something in the air tonight
That's making us feel so good, so good
Every once in a while sometimes
You gotta lose your mind!

Now we move like animals
Big white circle in the sky
The view so incredible
I wanna do this every night
We're moving like animals
Me and you are like animals
Like animals, yeah
I don't know, oh yeah
That's it.
