

New Generation

Nausea

You've seen them on the march
an endless struggle and fight
don't give in on the promise
except for what is right
fighting against traditions
fighting against religion
fighting for human rights
fighting for our existence
don't try to stop us
we'll give you one warning
we will make our stand
a new age is dawning. Their system~will you hear
will you see
will you care Like soldiers go to war
a battle of the streets
the oppressions of society
formed by their police
you're fighting against police
fighting against the state
fighting for their freedom
trying to create
do you really believe in peace?
as the world stands divided
will the kids ever understand
to be as one united. Their system~will you hear
will you see
will you care Now I'm on the march
joined in the fight
we're figuring out our problems
of what's wrong or right
fighting against sexism
fighting against racism
fighting for human rights
fighting for humanization
if you're looking for a future
free from war and hate
open up your eyes
to what the system tries to create.
