Light My Way

Nazareth

Locked in a shadow
Praying for release
You found my prison
Your love was the key
So come on, light myday
And come on, light my way

Lonely's just a word now Something from my past Horizon's look brighter Loving you will last So come on, light my day And come on, light my way

The world's now my oyster
Had me marked "reject"
You changed the story
Gave me back respect
So come on, light my day
And come on, light my way
