

# Moondance

Nazareth

Light with the mornings goes  
I live a long, forgotten shadow  
Love with the morning goes  
And what to do I just don't know  
The moon is on the run  
Another day to up and lay low  
Maddogs and noonday sun  
I need the darkness to show

Moondance.....Moondance

There goes a setting sun  
That's when we turn from strobe to struttin'  
Turn on the city lights  
'Cause you know I'm moody blue

Moondance....moondance

The women shadow box  
They're dancing tough but the ice is melting  
The music gives what it's got  
The moon is looking at you

Moondance.....moondance.....moondance
