

# Know Your Name

Ne-Yo

Excuse me  
I couldn't help but notice  
You noticing me  
And I was definitely noticing you  
My name is  
You know my name  
But listen  
I have a question

No it ain't like me to drop too hard  
Or go out of my way to know who you are  
Said if you're not one for chasing  
But I'll admit  
Something in you  
Has got my attention girl  
So if I can  
Be a gentleman  
Can I ask your permission girl

R: Said if it's alright with you  
Can I know your name  
And maybe call you sometime  
Can I know your name  
Can I know your name

Looking at you girl I see so much  
So much potential for something better than that  
Like maybe me and you becoming us  
I'm not trying to scare you  
But in your eyes  
I can see why  
People write love songs  
And if God allowed  
I could see how  
I could love you for so long

R: (2x)

Something about you  
That makes me wanna know you  
Said I wanna get to know you  
I just wanna show you me  
Said I really wanna get to know you  
See what this thing could be
