

## Plug Me In

Ned's Atomic Dustbin

The kids are actin' so hard  
Cooler than a grown man  
'til their feet are frozen so damn hard  
They wish that they weren't sober, then they could fly  
And they could sing if they really wished  
They need voltage, they need voltage to exist

Plug me in, plug me in  
I'm live by satellite

Making adverts, making films  
Designed by somebody sick  
Well they drive me mad  
Drive me up the wall  
No wonder I'm in the state I'm in, I could try  
Oh I could try to escape the American super bomb  
But it's no use and it's no fun
