

Plug Me In

Ned's Atomic Dustbin

The kids are actin' so hard
Cooler than a grown man
'til their feet are frozen so damn hard
They wish that they weren't sober, then they could fly
And they could sing if they really wished
They need voltage, they need voltage to exist

Plug me in, plug me in
I'm live by satellite

Making adverts, making films
Designed by somebody sick
Well they drive me mad
Drive me up the wall
No wonder I'm in the state I'm in, I could try
Oh I could try to escape the American super bomb
But it's no use and it's no fun
