## **Street Life**

## **Neil Diamond**

Hey, let me show you the street life Hey, let me show you the finks, The punks, the judge, the junkies Stay close to me for a while For a while, for a while

Say boy, you got to get street wise Hey, little boy You're a babe in arms Stay out of harm's way Wait right here with me for a while For a while, for a while

Street life, hell in the city You got to really watch out for that Street life Say, it ain't pretty You got to know your way around Or somehow you might get hurt Get hurt, get hurt

Say, let me show you the night life Say, let me show you the queens The dudes, the class, the crudes The folks that inhabit the night Let me set it right

I'm gonna give you my warning I'm gonna tell you the street's alive The sound of jive You've just arrived Try it for size for a while, for a while

Street life, hell in the city You got to really watch out for that Street life Say, it ain't pretty You got to know your way around Or somehow you might get hurt Get hurt, get hurt
