

I Let You Walk Away

Neil Sedaka

I believe that nothing lasts forever
Promises won't help us stay together
Life for us was never hearts and flowers my friend

It seems we couldn't solve life's problems
Maybe it's because we tried so seldom
So much must change today
That I can only hope and pray

As I watch you leave the room that I'll see you very soon
And it's all that I can do to keep from running after you
And though I wanted you
I let you walk away

It's just a simple case of heartache
My hands begin to tremble and my knees shake
Somewhere along the line I hope we can make amends

I believe that nothing lasts forever
Promises won't help us stay together
You may come home one day
Till then I only hope and pray

As I watch you leave the room that I'll see you very soon
And it's all that I can do to keep from running after you
And though I wanted you
I let you walk away
